EDUCATION

EIDIA, Euromed University of Fes

Engineering Degree in Artificial Intelligence

Fes, Morocco

2025 – Expected 2028

EIDIA, Euromed University of Fes

Preparatory Cycle in Digital Engineering

Fes, Morocco

2023 – 2025

EXPERIENCE

Software & AI Engineering Intern

Bounaim Auto

Jul. 2026 – Aug. 2026

Beni Mellal, Morocco

- Engineered **SmartImport**, a full-stack procurement decision-support platform covering **5 core workflows**: supplier quotations, multicurrency cost analysis, PDF/XLSX ingestion, AI-assisted extraction, and human review
- Built completeness-aware supplier comparison, Decimal-based landed-cost and cash-out calculations, PostgreSQL persistence, immutable analysis snapshots, and Dockerized delivery
- Validated **139 backend tests**; synthetic evaluation achieved **98.99% document-field F1**, **100% product-line F1**, and **92.31% top-1 matching** on eligible unique-match cases

Founder & Software Developer

Convoroute LLC

Jun. 2026 – Present

Remote

- Founded Convoroute LLC and develop a B2B SaaS for embedded AI chatbots supporting **3 business workflows**: customer support, FAQ automation, and lead capture
- Own product architecture across LLM integration, Stripe billing, pricing, deployment, and client implementation, from chatbot configuration through recurring-subscription setup and post-launch iteration

PROJECTS

DARE-Bench Agent Reliability Study | Python, OpenAI API, Docker, Statistical Evaluation

2026

- Designed and executed a reproducible **240-run** study across **24 DARE-Bench tasks**, comparing 3-turn and 5-turn agent budgets with five repeated runs per task-condition
- Measured exact-match success rising from **34.2% to 50.0%**; added official rescoring, bootstrap confidence intervals, failure analysis, and immutable run tracking

medskel — Medical Image Skeletonization | Python, OpenCV, Shapely, NumPy

2026

- Created a polygon/bisector skeletonization method and validated it with **28 hand-derived tests** and **9 reproducible experiments**
- Evaluated **28 retinal images**, reducing inter-observer vessel-length variation from **9.3% to 3.2%** versus pixel thinning ($p < 0.0001$)

UEMF Présence — Smart Attendance System | Next.js, React, TypeScript, PostgreSQL, Prisma

2026

- Developed and deployed a role-based attendance platform with GPS check-in, recurring schedules, and HMAC-SHA256 QR tokens rotating every **10 seconds**
- Added anti-fraud checks, professor review workflows, CSV reporting, and an anomaly dashboard across **3 user roles**: students, professors, and administrators

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, C++, SQL

AI & Data: LLM Agents, AI Evaluation, OpenAI API, scikit-learn, pandas, NumPy, OpenCV, Shapely

Frameworks: FastAPI, React, Next.js, SQLAlchemy, Pydantic, Prisma

Developer Tools: Git/GitHub, Docker, Linux, pytest, Alembic, Vercel, PostgreSQL

Spoken Languages: Arabic (Native), English (C1 — TOEFL iBT 112/120), French (B1), Spanish (Beginner)
